#### **Fund Update**

- Indo equity benchmark (JCI) successfully continued its uptrend to sit in the skyrocketing level of 6,605.63 on January 2018 (+3.93% YTD), backed by the astonishing strong growth of mining sector (+44.22%) and basic industry (+11.51%). The decelerating figure of foreign bids awarded at 14% of total incoming bid in the previous gov't bond auction could not halt the performance of Indo 10-yr Gov't bond return as the respective yield fell to 6.26% (0.95% MoM) coupled with strong Indo currency at Rp 13,397 (+1.26% MoM).
- In FY2017, the Indonesian economy expanded 5.07% YoY. Indonesia's statistics agency (BPS) announced that the nation's gross domestic product (GDP) growth reached 5.19% YoY in 4Q17. On one hand, it is positive that Indonesia's GDP growth is continuing to accelerate. In fact, the 5.07% growth figure is the nation's fastest full-year growth figure since 2013. Moreover, the 5.19% YoY growth figure in 4Q17 is the best Q4 GDP growth figure since 2013.
- Indonesia CPI recorded 0.62% of inflation in January 2018. Annual headline inflation in Indonesia eased to 3.25% YoY, from 3.61% YoY in the preceding month. BPS explained that Indonesia's January inflation was particularly caused by rising rice prices (contributing 0.24% to the inflation rate). Therefore, volatile food inflation was recorded at 2.58% YoY in January 2018.

Important Risk: The fund is actively managed and its characteristics will vary. Holdings shown should not be deemed as a recommendation to buy or sell securities. Fund of funds is subject to the risk associated with the underlying HPAM funds in which its invests. Stock and bond value fluctuate in price so the value of your investment can go down depending on the market conditions. Fixed income risk include interest-rate and credit risk. Typically, when interest rates rise, there is a corresponding decline in bond values. Credit risk refer to the possibility that the bond issuer will not be able to make principal and interest payments. Asset allocation strategies do not assure profit and do not protect against loss. Non-diversification of investment means that more assets are potentially invested in fewer securities than if investments were diversified.
